

INPATIENT DEMOGRAPHICS AND OUTCOMES

JANUARY 2021 THRU DECEMBER 2021

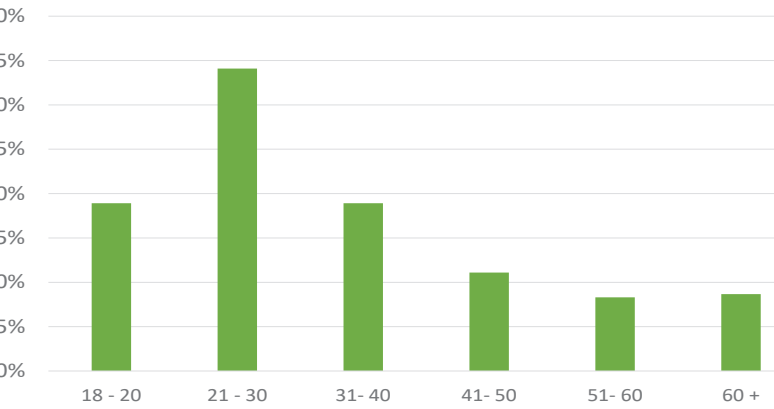

PRIMARY DIAGNOSIS INPATIENT

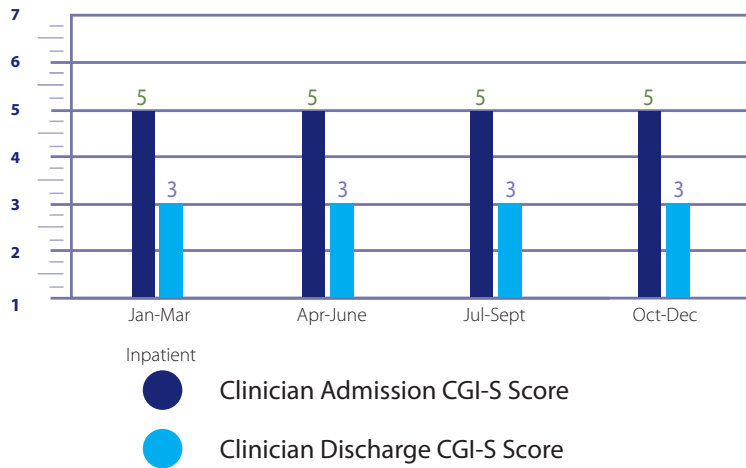

PATIENT BY GEOGRAPHIC AREA

PATIENT AGES

AVERAGE PATIENT IMPROVEMENT

PATIENT SATISFACTION

January 2021 thru December 2021

1-Strongly Disagree / 2-Disagree / 3-I am Neutral / 4-Agree / 5-Strongly Agree	
Likelihood to recommend Inpatient	4.57

Clinician Scale

- 1 = Normal, not at all ill
- 2 = Borderline mentally ill
- 3 = Mildly ill
- 4 = Moderately ill
- 5 = Markedly ill
- 6 = Severely mentally ill
- 7 = Among the most extremely ill patients

Usage of the CGI Scale: The CGI Scale is used at admission and discharge. The Mean of the CGI scores at admission and discharge are assessed as well as the mean of the change between scores from admission to discharge.

Interpretation of Results: An improvement of 1 point or greater is considered clinically significant and meaningful improvement. These results align with positive patient satisfaction scores. The graphs represent all patients who received both a CGI score at admission and at discharge. The numbers above the bars represent the average score for those patients.

Lindner Center of HOPE Residential and Inpatient Demographics and Outcomes

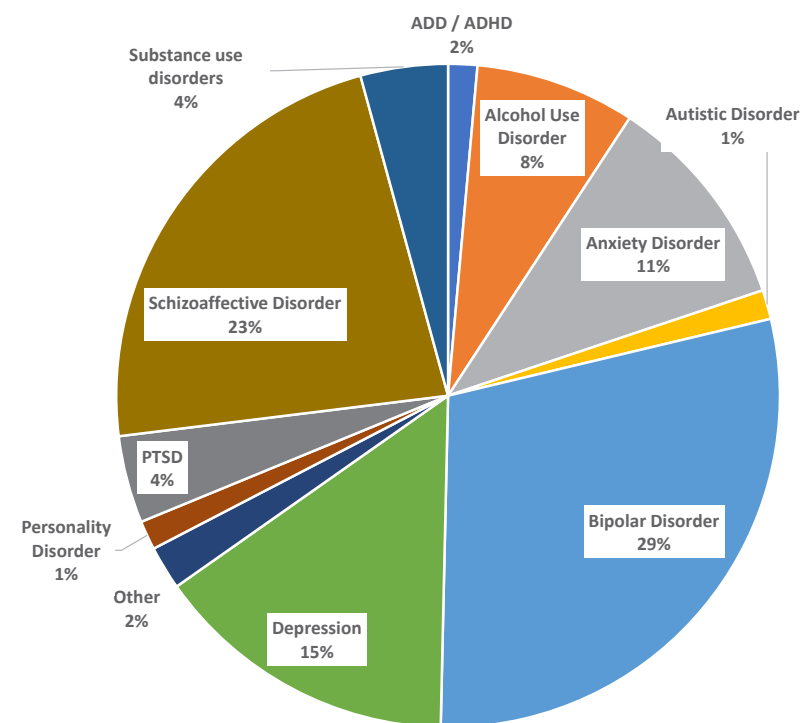

January 2021 - December 2021

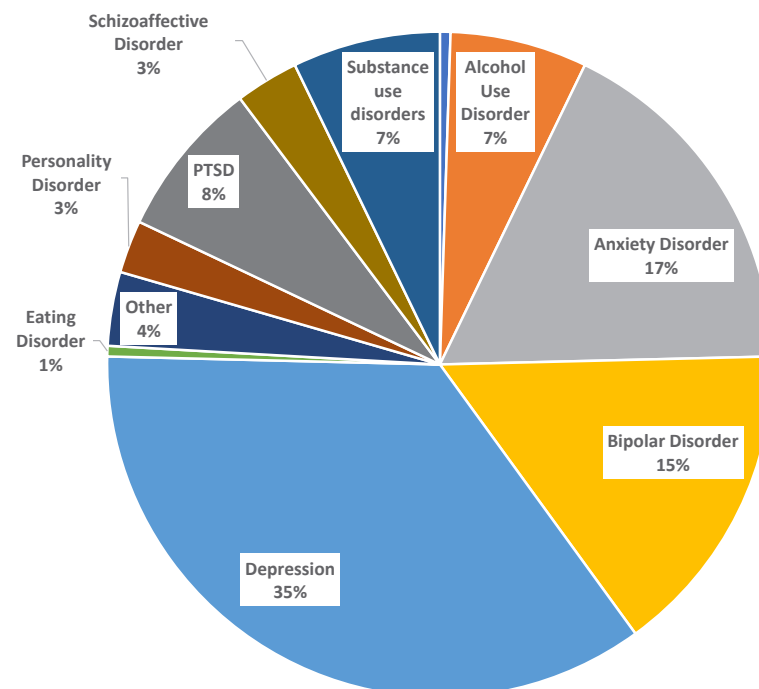

RESIDENTIAL DEMOGRAPHICS AND OUTCOMES

JANUARY 2021 THRU DECEMBER 2021

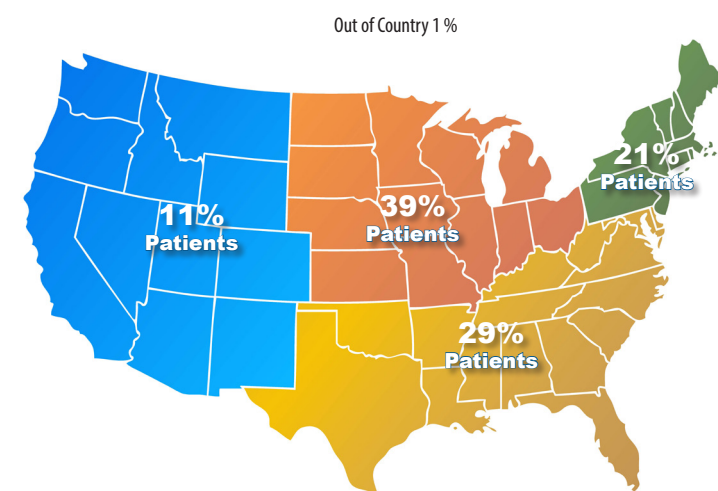

PRIMARY DIAGNOSIS WILLIAMS HOUSE

PRIMARY DIAGNOSIS SIBCY HOUSE

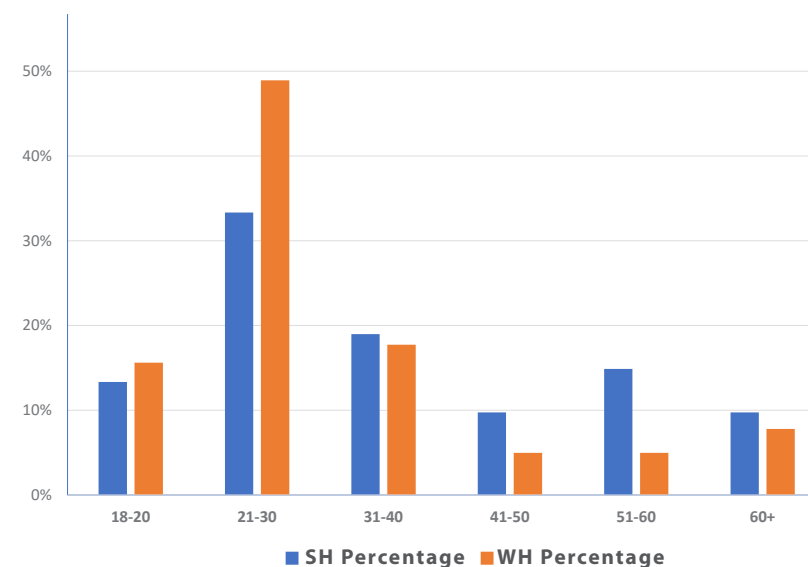

PATIENT BY GEOGRAPHIC AREA

Data from both Sibcy House and Williams House

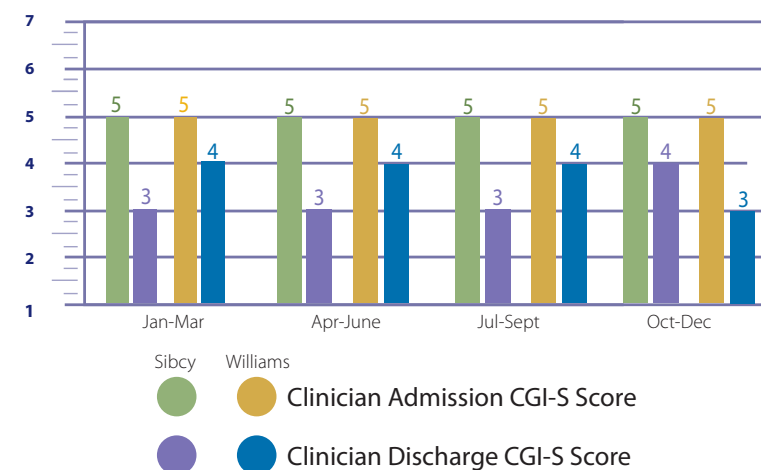

PATIENT AGES

RESIDENTIAL DEMOGRAPHICS AND OUTCOMES

JANUARY 2021 THRU DECEMBER 2021

AVERAGE PATIENT IMPROVEMENT

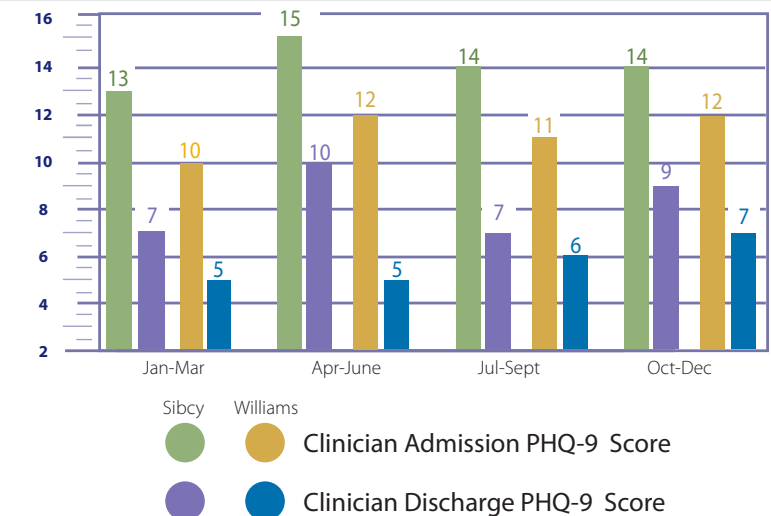

Clinician Scale

- 1 = Normal, not at all ill
- 2 = Borderline mentally ill
- 3 = Mildly ill
- 4 = Moderately ill
- 5 = Markedly ill
- 6 = Severely mentally ill
- 7 = Among the most extremely ill patients

Usage of the CGI Scale: The CGI Scale is used at admission and discharge. The Mean of the CGI scores at admission and discharge are assessed as well as the mean of the change between scores from admission to discharge.

Interpretation of Results: An improvement of 1 point or greater is considered clinically significant and meaningful improvement. These results align with positive patient satisfaction scores. The graphs represent all patients who received both a CGI score at admission and at discharge. The numbers above the bars represent the average score for those patients.

Patient Health Questionnaire (PHQ-9) Scale

- 0-4 Minimal or none
- 5-9 Mild
- 10-14 Moderate
- 15-19 Moderately severe
- 20-27 Severe

Usage of the PHQ-9: The PHQ-9 is used as a severity measure at admission and discharge. The mean of the change between scores from admission to discharge is assessed.

Interpretation of Results: An improvement of 1 point or greater is considered clinically significant and meaningful improvement. The graphs represent all patients who received PHQ scores both at admission and discharge. The numbers above the bars represent the average score for those patients.

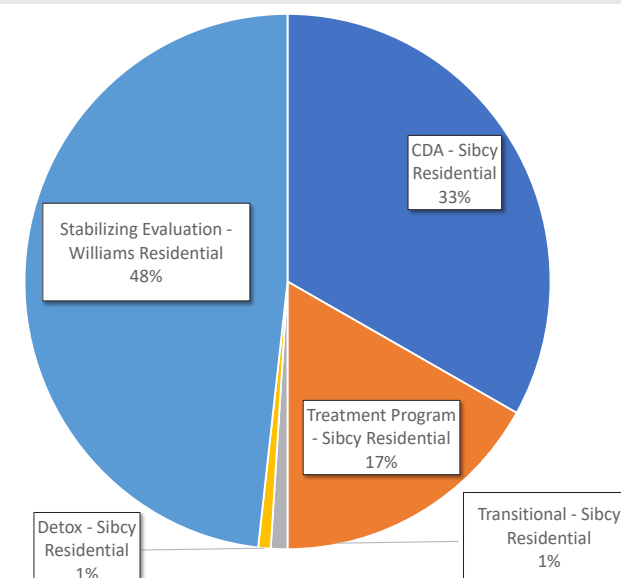

PATIENT SATISFACTION

January 2021 thru December 2021

1-Strongly Disagree / 2-Disagree / 3-I am Neutral / 4-Agree / 5-Strongly Agree

Likelihood to recommend Sibcy House	4.58
Likelihood to recommend Williams House	4.09
