

**Effective 6:30 am March 23, 2020, all those entering Lindner Center of HOPE facilities will have their temperature taken. You will need to enter through the Main Entrance of the building. If the reading is 100.4 or higher, those individuals will not be permitted in the building. All are encouraged to check temperatures at home, prior to traveling to our facility.**

**Visitors continue to be prohibited from entering the inpatient and residential psychiatry units at Lindner Center of HOPE. This restriction does not apply to professional visitors such as case managers, law enforcement or Court appointed personnel who have been screened by our healthcare staff prior to being granted access. However, those individuals will need to enter through the Main Lobby and have their temperature checked.**

**Cincinnati Children's Hospital Medical Center is following separate policies.**

**This decision to restrict patient visitors aligns with the processes put in place at other community hospitals and is in accordance with the Governor's recommendation for State Psychiatric Hospitals to help ensure the health and safety of our patients and staff.**
